

GANTT Chart Link:

<https://docs.google.com/spreadsheets/d/1ezwHtMZOnD1MuJXxf4l9EeE-eNfAmenWe3P7TFflwsY/edit?usp=sharing>

All the task information is located within the Tabs of the Excel sheet

- 1) The initial brainstorming is done within the Google Sheet under the tab called "tasks". We essentially wrote down all the possible tasks we will have for developing the website.
- 2) Gantt Chart tracking software: Google Sheet
- 3) Can get this from the link above.
- 4) Propose plan for updating Gantt: Each week, every Thursday during class time
- 5) Three Plans:
 - a) Plan A
 - i) An open source website that anyone could have access to, this would be the most useful for accessibility for research
 - b) Plan B
 - i) An app you could download from GitHub or partial functionality of the website. This would allow for partial use as well as accessibility.
 - c) Plan C
 - i) An accessible script
- 6) The critical path in our GANTT chart is the things highlighted in green. By understanding the Excel and researching, it gives our group the necessary information needed to build the website.
- 7) Key Risks to the success of this project
 - a) Meeting up (team meeting)
 - b) Staying on track
 - c) Skill limits
